

# DBMS LAB ASSIGNMENT-3

NAME: PASUMARTHI RUTWIK

REG NO: 19BCS084

1. Add, Modify and Delete Column using Alter Command

OUTPUT:

ADD:

The screenshot shows the SQL Server Enterprise Manager interface. On the left, the 'Object Explorer' pane displays the 'Movie\_Details' database structure, including tables, columns, keys, constraints, triggers, indexes, and statistics. The 'dbo.Film' table is selected. The main pane shows the SQL query editor with the following commands:

```
use Movie_Details;  
Alter table Film  
Add FilmName varchar(20);  
Alter table Film  
Alter column FilmName varchar(20);  
Alter table Film  
Drop column FilmName;
```

The 'Messages' pane at the bottom indicates that the commands were completed successfully.

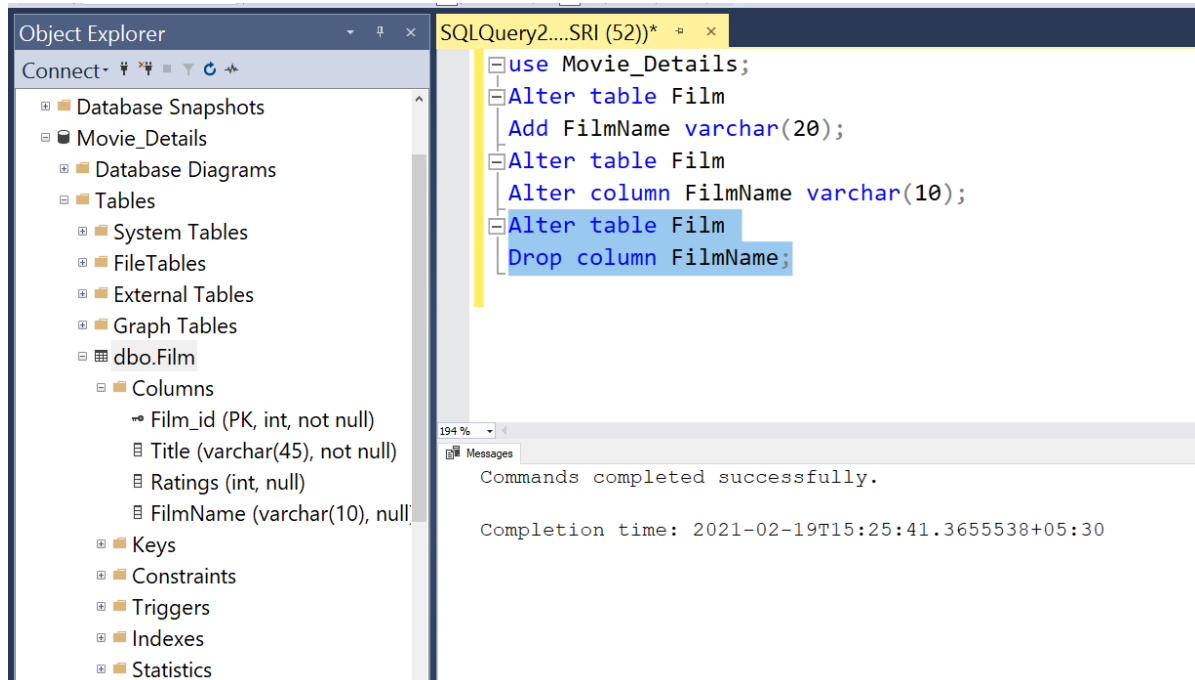

MODIFY:

The screenshot shows the SQL Server Enterprise Manager interface. On the left, the 'Object Explorer' pane displays the 'Movie\_Details' database structure, including tables, columns, keys, constraints, triggers, indexes, and statistics. The 'dbo.Film' table is selected. The main pane shows the SQL query editor with the following commands:

```
use Movie_Details;  
Alter table Film  
Add FilmName varchar(20);  
Alter table Film  
Alter column FilmName varchar(10);  
Alter table Film  
Drop column FilmName;
```

The 'Messages' pane at the bottom indicates that the commands were completed successfully.

DELETE:

2. Insert 20 Employees Data into all the tables. Use all the 3 methods that I have showcased

OUTPUT:

## SQLQuery2....SRI (52))\*

```
insert into Inventory(Inventory_id,Inventory_name)
values(2,'Rocky');
insert into Inventory(Inventory_id,Inventory_name)
values(3,'Rosie');
insert into Inventory(Inventory_id,Inventory_name)
values(4,'Riyan');
insert into Inventory(Inventory_id,Inventory_name)
values(5,'Aryan');
insert into Inventory(Inventory_id,Inventory_name)
values(6,'Manvi');
insert into Inventory(Inventory_id,Inventory_name)
values(7,'Steve');
insert into Inventory(Inventory_id,Inventory_name)
values(8,'Elena');
insert into Inventory(Inventory_id,Inventory_name)
values(9,'Demon');
insert into Inventory(Inventory_id,Inventory_name)
values(10,'Vidhi');
insert into Inventory(Inventory_id,Inventory_name)
values(11,'Vansh');
insert into Inventory(Inventory_id,Inventory_name)
values(12,'Bhavya');
insert into Inventory(Inventory_id,Inventory_name)
values(13,'Ridhima');
insert into Inventory(Inventory_id,Inventory_name)
values(14,'Ponky');
insert into Inventory(Inventory_id,Inventory_name)
values(15,'Munny');
insert into Inventory(Inventory_id,Inventory_name)
values(16,'Koneru');
insert into Inventory(Inventory_id,Inventory_name)
values(17,'Apoorva');
insert into Inventory(Inventory_id,Inventory_name)
values(18,'Lipsika');
insert into Inventory(Inventory_id,Inventory_name)
values(19,'Vanshika');
insert into Inventory(Inventory_id,Inventory_name)
values(20,'Kidnesh');

select * from Inventory;
```

3. Show Violation of Primary Key, Unique Not Null and default key constraints through insertion.

OUTPUT:

## PRIMARY KEY:

```
insert into Inventory(Inventory_id,Inventory_name)
values(1,'Reha');
```

5 %

Results Messages

Msg 2627, Level 14, State 1, Line 8  
Violation of PRIMARY KEY constraint 'FK\_\_Inventor\_\_2B66F8034692F585'. Cannot insert duplicate key in object 'dbo.Inventory'. The duplicate key value is (4  
The statement has been terminated.  
Msg 2627, Level 14, State 1, Line 10

## NOT NULL:

```
SQLQuery2....SRI (52))* ✖ ×
```

```
insert into Inventory(Inventory_id,Inventory_name)
values(20,'Kidnesh');

select * from Inventory;

insert into Inventory(Inventory_id,Inventory_name)
values( NULL,'Reha');
```

Results Messages

(20 rows affected)  
Msg 515, Level 16, State 2, Line 45  
Cannot insert the value NULL into column 'Inventory\_id', table 'Movie\_Details.dbo.In  
The statement has been terminated.

Completion time: 2021-02-19T15:56:54.9964357+05:30

## DEFAULT ERROR:

```
SQLQuery2....SRI (52))* x
use Movie_Details;
alter table Inventory
add constraint df_Inventory_id
default '10' for Inventory_id
insert into Inventory(Inventory_id,Inventory_name)
values(21,'reha');
```

165 %

Messages

Msg 1781, Level 16, State 1, Line 2  
Column already has a DEFAULT bound to it.  
Msg 1750, Level 16, State 0, Line 2  
Could not create constraint or index. See previous errors.

Completion time: 2021-02-19T16:12:03.6992878+05:30

4. Insert tuples into the table and see how foreign key constraint works if you try to insert into dependent table first.

OUTPUT:

```
SQLQuery2....SRI (52))* x
use Movie_Details;
insert into Film_actor
values(1,null,12);
```

165 %

Messages

Msg 547, Level 16, State 0, Line 2  
The INSERT statement conflicted with the FOREIGN KEY constraint "FK\_Film\_acto\_Film\_\_267ABA7A". The conflict occurred in  
The statement has been terminated.

Completion time: 2021-02-19T16:27:13.7226343+05:30

5. Show Violation of Foreign Key Constraint when you try to delete from a base table. If you get an error explain why deletion gives an error

OUTPUT:

```
SQLQuery2....SRI (52))*  
use Movie_Details;  
delete from Film_actor WHERE  
Film_id=12
```

6. Try to update a non-existing entity data and check for error.

OUTPUT:

```
SQLQuery2....SRI (52))*  
use Movie_Details;  
update film_actor  
set actor_name = 'Koneru'  
where Film_id=12
```

7. Add a column which has default value.

OUTPUT:

```
SQLQuery2....SRI (52))*  
use Movie_Details;  
ALTER TABLE Film  
ADD Title {varchar(45)}  
CONSTRAINT {actor} DEFAULT "reha"  
WITH VALUES
```

8. 5 Simple Select queries to retrieve data from your database.

OUTPUT:

9. Show how Foreign key constraint effects Updating a dependent table when value is not existing and in Base table where the value is referred and you want to update it.

OUTPUT:
